Hermes CLI Cheat Sheet

Hermes Agent CLI v1.0.0 • Last updated: April 9, 2026

GLOBAL FLAGS

CORE OPTIONS

- `-V, --version` Print version and exit
- `-p, --profile <name>` Use a named profile
- `-r, --resume` Resume last session
- `-c, --continue` Continue last session
- `-w, --worktree` Work in isolated git worktree
- `--yolo` Auto-approve all tool calls
- `--pass-session-id` Pass session ID to agent

OUTPUT STYLING

- `-v, --verbose` Verbose output
- `-Q, --quiet` Quiet mode
- `--no-color` Disable ANSI colors
- `--json` JSON output

SETUP & ONBOARDING

- `setup` Initialize config + workspace
- `doctor` Diagnose installation issues
- `config show` Show current config
- `config edit` Edit config file
- `config set <k> <v>` Set config value
- `config path` Show config file path
- `config check` Validate config
- `config migrate` Migrate config format

SETUP EXAMPLES

```
hermes setup
hermes setup --workspace ~/my-workspace
hermes setup --non-interactive
```

DOCTOR EXAMPLES

```
hermes doctor
hermes doctor --fix
hermes doctor --deep
```

CONFIG EXAMPLES

```
hermes config show
hermes config set model.default claude-sonnet-4
hermes config set gateway.port 19001
hermes config path
hermes config check
```

CHAT (hermes chat)

CORE OPTIONS

- `-q, --query <text>` One-shot query (no TUI)
- `-m, --model <id>` Override model
- `-t, --thinking <lvl>` off|minimal|low|medium|hi
- `--provider <name>` Override provider
- `-s, --session <id>` Session ID
- `-v, --verbose` Verbose output
- `-Q, --quiet` Quiet mode
- `--checkpoints` Enable checkpoints
- `--max-turns <n>` Max agent turns
- `--source <file>` Source file for context

EXAMPLES

```
hermes chat
hermes chat -q "Explain this code"
hermes chat -m claude-opus-4 -t high
hermes chat --provider openai -m gpt-4o
hermes chat -s my-session --checkpoints
hermes chat --max-turns 10 -q "Refactor"
hermes chat --yolo -q "Quick fix"
```

SLASH COMMANDS — SESSION

- `/new` Start new session
- `/clear` Clear conversation
- `/history` Show session history
- `/save` Save current session
- `/retry` Retry last response
- `/undo` Undo last exchange
- `/title <name>` Set session title
- `/compress` Compress conversation
- `/rollback <n>` Rollback n turns
- `/stop` Stop current generation
- `/queue <text>` Queue next prompt
- `/resume` Resume stopped generation
- `/statusbar` Toggle status bar
- `/background` Run in background
- `/btw <text>` Side note / reminder
- `/plan` Toggle plan mode
- `/branch` Branch conversation

SLASH COMMANDS — CONFIG

- `/config` Show current config
- `/model <id>` Switch model
- `/provider <name>` Switch provider
- `/prompt <text>` Set system prompt
- `/personality <type>` Set personality mode
- `/verbose` Toggle verbose mode
- `/reasoning <lvl>` Set reasoning level
- `/skin <name>` Set TUI skin
- `/voice` Toggle voice output
- `/yolo` Toggle auto-approve

SLASH COMMANDS — TOOLS

- `/tools` List available tools
- `/toolsets` List toolsets
- `/browser` Browser control
- `/skills` Manage skills
- `/cron` Manage cron jobs
- `/reload-mcp` Reload MCP servers
- `/plugins` Manage plugins

INFO & EXIT

- `/help` Show help
- `/usage` Show token usage
- `/insights` Show insights
- `/platforms` List platforms
- `/paste` Paste content
- `/profile` Profile info
- `/quit` Exit session

SLASH COMMANDS — MESSAGING

- `/send <text>` Send message
- `/reply <text>` Reply to message
- `/broadcast <text>` Broadcast to all
- `/react <emoji>` React to message
- `/pin` Pin message
- `/unpin` Unpin message
- `/thread` Create thread
- `/search <query>` Search messages
- `/status` Show status
- `/typing` Show typing indicator
- `/channel` Switch channel
- `/attach <file>` Attach file
- `/image <prompt>` Generate image
- `/tts <text>` Text to speech

PROFILES

- `profile list` List all profiles
- `profile use <name>` Switch to profile
- `profile create <name>` Create new profile
- `profile delete <name>` Delete profile
- `profile show <name>` Show profile details
- `profile alias <a> <b>` Create alias
- `profile rename <old> <new>` Rename profile
- `profile export <name>` Export profile
- `profile import <file>` Import profile

CREATE OPTIONS

- `--clone <src>` Clone from profile
- `--clone-all` Clone everything
- `--clone-from <src>` Clone from source

EXAMPLES

```
hermes profile list
hermes profile create work --clone default
hermes profile use work
hermes profile export work > work.json
hermes profile import work.json
```

GATEWAY

- `gateway run` Run gateway (foreground)
- `gateway start` Start gateway daemon
- `gateway stop` Stop gateway
- `gateway restart` Restart gateway
- `gateway status` Gateway status
- `gateway install` Install gateway service
- `gateway uninstall` Uninstall gateway
- `gateway setup` Interactive setup

GATEWAY RUN OPTIONS

- `--port <port>` Listen port
- `--bind <mode>` loopback|tailnet|lan|auto
- `--token <token>` Auth token
- `--auth <type>` token|password
- `--tailscale <mode>` off|serve|funnel
- `--force` Kill existing listener

EXAMPLES

```
hermes gateway run
hermes gateway run --port 19001
hermes gateway run --auth token --token my-secret
hermes gateway run --tailscale serve
hermes gateway install --port 19001
hermes gateway status
```

MODELS

- `model list` List available models
- `model set <model>` Set default model
- `model providers` List providers
- `model fallbacks list` List fallbacks
- `model fallbacks add <m>` Add fallback model

EXAMPLES

```
hermes model list
hermes model set claude-sonnet-4
hermes model providers
hermes model fallbacks add claude-haiku-4
```

AUTH

- `auth add` Add auth credentials
- `auth list` List auth providers
- `auth remove <name>` Remove auth provider
- `auth reset` Reset all auth

EXAMPLES

```
hermes auth add
hermes auth add --provider anthropic --api-key sk-ant-xxx
hermes auth list
hermes auth remove openai
```

SKILLS

- `skills browse` Browse skill catalog
- `skills search <q>` Search skills
- `skills install <slug>` Install skill
- `skills inspect <slug>` Inspect skill details
- `skills list` List installed skills
- `skills check` Check skill status
- `skills update` Update skills
- `skills audit` Audit skills
- `skills uninstall <slug>` Uninstall skill
- `skills publish <path>` Publish skill
- `skills snapshot` Snapshot skills state
- `skills tap <slug>` Tap into skill source
- `skills config <slug>` Configure skill

EXAMPLES

```
hermes skills browse
hermes skills search "web scraping"
hermes skills install smart-search
hermes skills inspect web-search
hermes skills update --all
hermes skills publish ./my-skill
```

STATUS & HEALTH

- `status` Quick diagnostics
- `status --deep` Full diagnosis
- `status --usage` Show usage/quota

EXAMPLES

```
hermes status
hermes status --deep
hermes status --usage
```

SESSIONS

- `sessions list` List sessions
- `sessions browse` Browse sessions
- `sessions export <id>` Export session
- `sessions delete <id>` Delete session
- `sessions prune` Prune old sessions
- `sessions stats` Session statistics
- `sessions rename <id> <name>` Rename session

EXAMPLES

```
hermes sessions list
hermes sessions export abc123
hermes sessions prune --older-than 7d
hermes sessions stats
```

CRON

- `cron list` List cron jobs
- `cron create` Create cron job
- `cron add` Add cron job (alias)
- `cron edit <id>` Edit cron job
- `cron pause <id>` Pause cron job
- `cron resume <id>` Resume cron job
- `cron run <id>` Run cron job now
- `cron remove <id>` Remove cron job
- `cron status` Cron status
- `cron tick` Trigger tick

WEBHOOKS

- `webhook subscribe` Subscribe to webhook
- `webhook add` Add webhook (alias)
- `webhook list` List webhooks
- `webhook remove <id>` Remove webhook
- `webhook test <id>` Test webhook

EXAMPLES

```
hermes webhook subscribe --url https://example.com/hook
hermes webhook list
hermes webhook test my-hook
```

MCP SERVERS

- `mcp serve` Serve as MCP server
- `mcp add <name>` Add MCP server
- `mcp remove <name>` Remove MCP server
- `mcp list` List MCP servers
- `mcp test <name>` Test MCP server
- `mcp configure <name>` Configure MCP server

MCP CONFIG KEYS

- `command` Server command
- `args` Command arguments
- `env` Environment variables
- `url` Remote URL
- `tools_policy` include|exclude|resources|prompts

EXAMPLES

```
hermes mcp list
hermes mcp add my-server --command npx --args "-y,mcp-server"
hermes mcp test my-server
```

PLUGINS

- `plugins install <id>` Install plugin
- `plugins update <id>` Update plugin
- `plugins remove <id>` Remove plugin
- `plugins enable <id>` Enable plugin
- `plugins disable <id>` Disable plugin
- `plugins list` List plugins

EXAMPLES

```
hermes plugins list
hermes plugins install voicecall
hermes plugins enable voicecall
hermes plugins update --all
```

TOOLS — BROWSER

- `browser_navigate` Navigate to URL
- `browser_click` Click element
- `browser_type` Type into input
- `browser_screenshot` Take screenshot
- `browser_snapshot` Page accessibility tree
- `browser_scroll` Scroll page
- `browser_hover` Hover over element
- `browser_evaluate` Execute JavaScript
- `browser_select` Select option
- `browser_wait` Wait for condition

TOOLS — FILE & TERM

FILE TOOLS

- `file_read` Read file contents
- `file_write` Write to file
- `file_edit` Edit file (diff)
- `file_search` Search in files

TERMINAL TOOLS

- `terminal_exec` Execute command
- `terminal_script` Run script

WEB TOOLS

- `web_fetch` Fetch web content
- `web_search` Search the web

TOOLS — OTHER

VISION & MEDIA

- `vision_analyze` Analyze image
- `image_gen` Generate image
- `code_execution` Execute code

MEMORY & SKILLS

- `memory` Memory operations
- `skills_list` List skills
- `skills_install` Install skill
- `skills_execute` Execute skill

MISC

- `delegation` Delegate to sub-agent
- `cronjob` Manage cron jobs
- `clarify` Ask clarifying question
- `tts` Text to speech
- `todo` Task management
- `session_search` Search sessions
- `messaging` Send messages
- `moa` Mixture of agents

TOOLS — RL & HA

RL TOOLS (10)

- `rl_list` List RL tools
- `rl_evaluate` Evaluate actions
- `rl_reward` Compute reward

HOME ASSISTANT

- `ha_list_devices` List devices
- `ha_control` Control device
- `ha_get_state` Get entity state
- `ha_call_service` Call HA service

TOOLSETS

CORE (20)

- `browser` Web automation (10 tools)
- `file` File operations (4)
- `terminal` Shell execution (2)
- `web` Web fetch & search (2)
- `vision` Image analysis (1)
- `memory` Memory ops (1)
- `skills` Skill management (3)
- `delegation` Sub-agents (1)
- `cronjob` Scheduled tasks (1)
- `clarify` Clarification (1)
- `code_execution` Code runner (1)
- `image_gen` Image generation (1)
- `messaging` Cross-platform (1)
- `moa` Mixture of agents (1)
- `rl` RL tools (10)
- `session_search` Session search (1)
- `todo` Task management (1)
- `tts` Text to speech (1)
- `homeassistant` Smart home (4)

COMPOSITE

- `debugging` file + terminal + browser
- `safe` file + web + skills (no exec)

PLATFORM (18+)

- `hermes-cli` CLI agent
- `hermes-acp` ACP protocol
- `hermes-api-server` API server
- `hermes-telegram` Telegram bot
- `hermes-discord` Discord bot
- `hermes-slack` Slack bot
- `hermes-whatsapp` WhatsApp bot
- `hermes-signal` Signal bot
- `hermes-matrix` Matrix bot
- `hermes-mattermost` Mattermost bot
- `hermes-email` Email channel
- `hermes-sms` SMS channel
- `hermes-dingtalk` DingTalk bot
- `hermes-feishu` Feishu/Lark bot
- `hermes-wecom` WeCom bot
- `hermes-homeassistant` Home Assistant
- `hermes-webhook` Webhook channel
- `hermes-gateway` Gateway channel

ENV VARS — LLM

PROVIDER KEYS

- `ANTHROPIC_API_KEY` Anthropic API key
- `OPENAI_API_KEY` OpenAI API key
- `GOOGLE_API_KEY` Google/Gemini API key
- `GROQ_API_KEY` Groq API key
- `OPENROUTER_API_KEY` OpenRouter API key
- `DEEPSEEK_API_KEY` DeepSeek API key
- `MISTRAL_API_KEY` Mistral API key
- `COHERE_API_KEY` Cohere API key

PROVIDER CONFIG

- `HERMES_DEFAULT_MODEL` Default model ID
- `HERMES_DEFAULT_PROVIDER` Default provider
- `HERMES_THINKING_LEVEL` Default thinking level
- `HERMES_BASE_URL` Custom base URL
- `HERMES_MAX_TOKENS` Max output tokens
- `HERMES_TEMPERATURE` Sampling temperature

ENV VARS — MESSAGING

- `TELEGRAM_BOT_TOKEN` Telegram bot token
- `DISCORD_BOT_TOKEN` Discord bot token
- `SLACK_BOT_TOKEN` Slack bot token
- `SLACK_APP_TOKEN` Slack app token
- `WHATSAPP_SESSION_ID` WhatsApp session
- `SIGNAL_PHONE_NUMBER` Signal phone number
- `SMS_TWILIO_SID` Twilio account SID
- `SMS_TWILIO_TOKEN` Twilio auth token
- `SMTP_HOST / PORT` Email SMTP config
- `SMTP_USER / PASS` Email auth
- `DINGTALK_TOKEN` DingTalk token
- `MATTERMOST_TOKEN` Mattermost token
- `MATRIX_HOMESERVER` Matrix server URL
- `MATRIX_ACCESS_TOKEN` Matrix access token
- `HOMEASSISTANT_URL` HA server URL
- `HOMEASSISTANT_TOKEN` HA long-lived token

ENV VARS — AGENT

AGENT BEHAVIOR

- `HERMES_SYSTEM_PROMPT` Default system prompt
- `HERMES_PERSONALITY` Personality mode
- `HERMES_MAX_TURNS` Max agent turns
- `HERMES_YOLO` Auto-approve mode
- `HERMES_CHECKPOINTS` Enable checkpoints

TERMINAL & CONTAINER

- `HERMES_TERMINAL_BACKEND` local|ssh|container
- `HERMES_SSH_HOST` SSH host
- `HERMES_SSH_USER` SSH user
- `HERMES_CONTAINER_RUNTIME` docker|podman
- `HERMES_CONTAINER_IMAGE` Container image
- `HERMES_CONTAINER_MEMORY` Memory limit
- `HERMES_CONTAINER_CPUS` CPU limit

SESSION

- `HERMES_SESSION_DIR` Session storage dir
- `HERMES_WORKSPACE` Workspace directory
- `HERMES_PERSISTENT_SHELL` Keep shell alive

HONCHO

- `honcho setup` Setup Honcho
- `honcho status` Honcho status
- `honcho peers` List peers
- `honcho sessions` List Honcho sessions
- `honcho map` Map knowledge graph
- `honcho peer <id>` Show peer details
- `honcho mode <mode>` Set Honcho mode
- `honcho tokens` Token management
- `honcho identity` Show identity
- `honcho enable` Enable Honcho
- `honcho disable` Disable Honcho
- `honcho sync` Sync state
- `honcho migrate` Migrate data

MEMORY

- `memory setup` Setup memory system
- `memory status` Show memory stats
- `memory off` Disable memory

ACP

- `acp` ACP protocol commands
- `acp client` ACP client operations

INSIGHTS

- `insights` Show usage insights
- `insights --detailed` Detailed insights
- `insights --usage` Token usage stats

PAIRING

- `pairing list` List pairings
- `pairing approve <id>` Approve pairing

WHATSAPP

- `whatsapp setup` Setup WhatsApp
- `whatsapp login` Login to WhatsApp
- `whatsapp logout` Logout from WhatsApp
- `whatsapp status` WhatsApp status

EXAMPLES

```
hermes whatsapp setup
hermes whatsapp login --verbose
hermes whatsapp status
```

CLAW MIGRATION

- `claw migrate` Migrate from OpenClaw

OPTIONS

- `--config` Migrate config
- `--sessions` Migrate sessions
- `--skills` Migrate skills
- `--agents` Migrate agents
- `--all` Migrate everything
- `--dry-run` Preview only

EXAMPLES

```
hermes claw migrate --all
hermes claw migrate --config --dry-run
```

SKILLS CATALOG (1/4)

SOFTWARE DEVELOPMENT

`code-review` `refactor` `test-gen` `debug-assist` `api-design` `doc-gen`

DATA SCIENCE

`data-analysis` `visualization` `ml-train`

DEVOPS

`deploy` `monitor` `infra-manage` `ci-cd`

RESEARCH

`web-research` `paper-summary` `patent-search`

PRODUCTIVITY

`summarize` `translate` `schedule` `email-draf`

GITHUB

`pr-review` `issue-triage` `release-notes`

MLOPS

`model-eval` `experiment-track` `pipeline`

SKILLS CATALOG (2/4)

CREATIVE

`creative-writing` `brainstorm` `story-gen`

SOCIAL MEDIA

`social-post` `content-plan` `engagement`

MEDIA

`image-edit` `video-gen` `audio-edit`

GAMING

`game-strategy` `npc-dialogue` `level-gen`

LEISURE

`trivia` `puzzle-solve` `recipe-gen`

NOTE-TAKING

`obsidian` `notion-sync` `markdown-gen`

APPLE

`apple-shortcuts` `apple-script`

SKILLS CATALOG (3/4)

AUTONOMOUS AI AGENTS

`auto-code` `auto-debug` `auto-deploy`

RED TEAMING

`pentest` `vuln-scan` `exploit-dev`

SMART HOME

`ha-automate` `ha-control` `ha-monitor`

MCP

`mcp-server` `mcp-client` `mcp-bridge`

DOGFOOD

`self-test` `self-improve` `self-doc`

EMAIL

`email-draft` `email-reply` `email-summary`

INFERENCE.SH

`inference-run` `inference-deploy`

SKILLS CATALOG (4/4)

OPTIONAL SKILLS

- `blockchain` Web3 & smart contracts
- `blender-mcp` 3D modeling via MCP
- `meme-generation` Generate memes
- `docker-management` Docker container ops
- `agentmail` Email agent integration
- `neuroskill-bci` Brain-computer interface
- `fastmcp` Fast MCP server builder
- `telephony` Voice call integration
- `bioinformatics` Bio data analysis
- `security` Security audit tools

INSTALL OPTIONAL

```
hermes skills install blockchain
hermes skills install blender-mcp
hermes skills install telephony
```

MCP CONFIG

SERVER CONFIG SHAPE

- `mcpServers.<name>` Server entry
- `.command` Executable path
- `.args` Argument array
- `.env` Environment map
- `.url` Remote SSE/WS URL

TOOLS POLICY

- `tools_policy.include` Allowlist tools
- `tools_policy.exclude` Blocklist tools
- `tools_policy.resources` Allow resources
- `tools_policy.prompts` Allow prompts

AUTH & SECURITY

- `oauth 2.1` OAuth flow support
- `tool naming` mcp__<server>__<tool>

MAINTENANCE

- `version` Show version
- `update` Update Hermes
- `uninstall` Uninstall Hermes
- `completion` Generate shell completion

COMPLETION OPTIONS

- `-s, --shell <shell>` zsh|bash|fish|powershell
- `-i, --install` Install to profile

EXAMPLES

```
hermes version
hermes update
hermes uninstall
hermes completion -s zsh -i
```
